CERTIFIED MAIL

M. R. Sweeney
Power Systems
P.O. Drawer G
Mattoon, Illinois

Subject: Pyrotechnic Operation

Dear Mr. Sweeney:

This is to advise you of the findings of this office pertaining to your request for a variance from the rules and regulations of the Illinois Air Pollution Control Board pertaining to the conduct of a refuse disposal operation by open burning.

Based upon investigation of your open burning facilities conducted by our engineer, Mr. Anton Telford, on November 7, 1967, and the information you submitted we concluded that disposal operations can be conducted by open burning at this site without causing injurious effects of air pollution.

You are hereby advised that subject to approval by the Board a variance from Rule 2-1.2 of the Board's regulations is granted for a period of six months from the date of this letter provided that your disposal operation is conducted as set forth in your request for variance.

This variance is subject to review for revocation at any time that the Board should determine that your conduct of a disposal operation by open burning is causing injurious effects of air pollution.

Very truly yours,

C. W. Klassen
Technical Secretary
